Available Courses @ Congenital Heart Campus 2019

23 May

- Transposition of the Great Arteries*
- New Strategies in Cardiac Surgery*
- Low Cardiac Output: State of the Art
- Pulmonary Atresia/VSD/MAPCA
- Heart Failure in Children
- Transesophageal Echo
- Arrhythmia Surgery

Abstract Presentations:
- General Pediatric Cardiology
- Electrophysiology and Neonatology

24 May

- Mechanical Circulatory support*
- Cardiac Imaging: State of the Art*
- Hemostasis: State of the Art
- Channelopathies
- Cardiopulmonary Interactions
- PDA in the Neonate
- Intraoperative Monitoring
- Common Arrhythmias in Children

Abstract Presentations:
- Imaging, Fetal and Nursing

25 May

- Functionally Univentricular Heart I*
- Cardiac Catheterization Update*
- Cardiovascular Nursing
- Chest Pain in Children
- The Brain in CHD
- Heart Transplant/Artificial Heart
- Fetal CHD: Delivery Considerations
- Maternal CHD: Delivery Considerations

Basic Science: Cardiac Development
- Myocardial Protection/Cardioplegia
- Imaging in the Neonate
- Pacing and Devices

26 May

- Basics of Congenital Heart Disease*
- Cardiac Anesthesia Update
- Hands On Sessions
- Arrhythmias in Adult CHD/GUCH
- Catheterization in Adult CHD/GUCH
- Fetal Arrhythmias
- Basic Science: Genetics in CHD

Kawasaki Disease*
- Congenitally Corrected TGA
- CHD for the ACHD/Adult Cardiologist
- Evaluation of the Cyanotic Neonate
- Cath Closure of Septal Defects
- New Perfusion Technology
